Pull Cord Cheat Sheet (ZB1.04 and Later)

Contents:

1) How to Ship
2) How to Water

1) How to Ship

1 - Pull Shipping cord to start moving
2 - Pull Programming cord and hold to slow down. Hold longer to slow down more.
3 - Release Programming cord and pull and hold again to speed up. Hold longer to speed up more
4 - Pull Shipping cord to stop moving
5 - The boomerang will stop on its own at home

2) How to Water

From Home:

1 - Test Phase
    - Pull Programming Cord to test valves (all valves start pulsing)
    - Pull and hold Shipping Cord to set purge time
    - Do not pull Shipping Cord if you don't want any purge/ don't want to change purge
2 - Water Phase
    - From Test Phase, pull the Programming Cord once to start moving
    - Pull and hold Programming cord in between hooks to slow down / speed up
    - Pull and hold Programming cord just before a hook to set water time for that layer
    - Pull Shipping cord to stop
    - Otherwise the Boomerang should stop at home.

From Anywhere Else:

- Pull the Programming Cord once to start moving
- Pull and hold Programming cord in between hooks to slow down / speed up
- Pull and hold Programming cord just before a hook to set water time for that layer
- Pull Shipping cord to stop
- Otherwise, the Boomerang should stop at home
